

## Heavy Duty Drawer Workbench

CYJY is a China Supplier and Manufacturer of heavy duty drawer workbench. The heavy duty drawer workbench is a high-quality workbench with multiple drawers, usually constructed of heavy-gauge cold-rolled steel, suitable for a variety of industrial, manufacturing, design and assembly operations, providing users with comfortable, efficient and convenient work experience. CYJY workbench are available in any size to meet your requirements.

## Heavy Duty Drawer Workbench

The high-quality **heavy duty drawer workbench** is made by CYJY. It is exquisite in workmanship, durable and loved by friends all over the world. The overall frame of the **heavy duty drawer workbench** is made of cold-rolled steel plate, which has strong stability and is durable; the drawer is made of galvanized steel plate, which is waterproof and anti-corrosion; the workbench top and handle are made of 304 stainless steel. It has good corrosion resistance, heat resistance and high rust resistance. The **heavy duty drawer workbench** is a professional-grade industrial type workbench, which is usually used in industrial fields such as machine manufacturing workshops, maintenance workshops, laboratories and factories.

## **The heavy duty drawer workbench has the following features**

1. The appearance is strong and the lines are simple. The outer surface is usually made of corrosion-resistant and scratch-resistant metal materials to ensure its long service life.
2. The working area is wide, and the working area of some large workbenches will be large.
3. Due to the use of heavy-duty structural materials, it has extremely high stability and can withstand certain weight and impact.
4. The storage compartment designed with 20 drawers can store tools and spare parts of various specifications, which is convenient for workers to quickly find the working materials they need.
5. The tool storage system attached to the workbench can meet the storage of various types of tools and keep the work site clean and orderly.
6. The drawers of the workbench are made of galvanized steel, and each drawer has slides to ensure that the staff can easily open and close the drawers during use, and operate the work in the industrial field through the correct classification of materials.
